WORKERS PLEDGE TO STEP UP CONSTRUCTION  
OF NITROGEN FERTILIZER PLANT

POWER PLANT WORKERS ALSO MAKE PLEDGE -- Sofia, Izgrev, 14 Nov 50

Pencho Kubadinski, director of the state construction association in Dimitrovgrad has announced the pledge made to Prime Minister Cheryenkov by the workers engaged in the construction of the Stalin Nitrogen Fertilizer Plant and the Maritsa 3 thermalelectric power plant. The engineers, architects, technicians, workers, and labor service crews pledge to fulfill the following objectives:

1. To direct all their efforts toward the establishment of a unified collective operating organization able to overcome the handicaps created by hard winter conditions and to fulfill the construction program accurately.
2. To dispatch permanent production brigades consisting of foremen, general workers, labor service crews, engineers, and assistants, for steady work on particular construction objects.
3. To promote competitive work among the brigades and to adopt it as the permanent work system. Daily work charts will be set up and their daily fulfillment scrupulously reported.
4. The construction site will be cleared of building materials. General equipment and fitting yards, a limekiln, and concrete plant will be set up before 15 December 1950.
5. The capacity of construction machines will be fully utilized, including concrete mixers, windlasses, conveyor belts, small locomotives, etc. Mobile brigades will be dispatched for immediate repairs on the premises.

6. Work on important installations will be operated in three shifts. The most important constructions, such as the "composite buildings" 165, 164, and 167 of the Nitrogen Fertilizer Plant, will be carried out by 1,200 workers operating around the clock in three shifts, and will be completed for operation 10 days ahead of schedule.

7. The living conditions of the workers will be substantially improved. Dwellings for 2,000 people will be ready for occupation before 30 November 1950.

PLEDGE TO COMPLETE NITROGEN FERTILIZER PLANT IN 1951 -- Sofia, Izgrev, 14 Nov 50

Diko Ivanov, director general of the Stalin Nitrogen Fertilizer Plant now under construction, made public the following pledge given by the construction and assembly workers engaged at the project:

After accepting the new, shorter term established by the Central Committee of the Bulgarian Communist Party and the government for the completion of the project, the workers and assemblers are pledging to complete for operation on 21 December 1951 the machine repair shop and the sulfuric acid plant, in honor of Stalin's 71st birthday. In spite of the fact that 40 percent of the sulfuric acid plant is still uncompleted, the workers promise the Central Committee and Prime Minister Chervenkov that they will pass the test with flying colors, and will complete assembly work ahead of schedule and will complete the whole plant on 15 November 1951.
